```
graph TD; Start([Start]) --> 202[202: Plurality of messages from message sources]; 202 --> 204[204: For more characteristics associated with the plurality of messages to one or more values specific to the user of the mobile terminal]; 204 --> 206[206: Proximity associated with each message in relation to the mobile terminal]; 206 --> 208[208: Icon with each of the plurality of messages]; 208 --> 210[210: Priority section of the display, a first icon corresponding to a message having one or more characteristics that best match the one or more values using a display format that is distinct from the other icons in the priority section]; 210 --> 212[212: Proximity section of the display, a first icon corresponding to a message source of least proximity using a display format distinct from the other icons in the proximity section];
```

The flowchart illustrates a method for displaying messages. It begins with a 'Start' terminal, leading to step 202: 'Plurality of messages from message sources'. Step 204: 'For more characteristics associated with the plurality of messages to one or more values that are specific to the user of the mobile terminal' follows. Step 206: 'Proximity associated with each message in relation to the mobile terminal' is next. Step 208: 'Icon with each of the plurality of messages' follows. Step 210: 'Priority section of the display, a first icon corresponding to a message having one or more characteristics that best match the one or more values using a display format that is distinct from the other icons in the priority section' is next. Finally, step 212: 'Proximity section of the display, a first icon corresponding to a message source of least proximity using a display format distinct from the other icons in the proximity section' is the last step shown.
